Know Your Constitution

A good sign of active student government is when much of the campus is conscious of its activities.

As has been the case in many of the past few weeks, student government has been one of the chief topics of conversation.

However, much of the student government chatter has had little constructive value, while a subject like the Constitutional revisions go unmentioned:

Constitutional changes made now will affect student

government over the period of the next year. Here are some proposed changes that El Don feels would

be in order in the new Constitution. 1) Change the Commissioners' offices from appointive to elective.

2) If the offices are to remain appointive, the Commissioner should hold no vote on the council.

3) Stabilize the Supreme Court by a constructive study of its operation. Add its powers, limitations, and other necessary details to the Constitution.

The Supreme Court can be a powerful and useful body

if its functions can be clearly designated. The only way the new Constitution can be a success is if the entire student body be familiar with it, not just the members of the student council.

(Editor's note: With the upcoming Civic Beautification week in Santa Ana set for April 3 to 9 it seems appropriate to note that last year Santa Ana College was awarded one of the beautification certificates in last years observance of beautification week.

One of the most important aspects of beautification is the absence of litter. Since the planting of grass and shrubbery between the B buildings, our campus has greatly improved in appearance. However there still remains the problem of litter. The following is a reprint of an article written by George M. Heldt, State Park Ranger, Monterey.)

> HELP ERADICATE THIS PLANT! (Litterbugsii godroppium traschica)

A very obnoxious weed, closely related to the Beercan and Wine-bottle plants. It is widely cultivated in "civilized" countries and has attained worldwide distribution.

It's range extends throughout the scenic mountain areas and valley of California, wherever man has passed. Usually it is found in close association with the slower growing native plant species, entangled with the dense undercover.

In State and National Parks, in National Forests, on sand dunes, along the picturesque rocky shore and over sandy beaches the Litterbug Flower blooms throughout the year. Elsewhere its presence along roadways, footpaths and even on the floors of buildings can go unnoticed. It is the only flower that may be picked at any time!

Only through public support and individual cooperation can this very undesirable plant be exterminated. Its existence depends solely on the lack of appreciation for the natural beauty found throughout this grea country of

Clark: "Oh, he's doing alright. He ran a 20.8 in the 220 yesterday against the wind and around a turn. The world record is 20.6 on a straightaway. He'll come around."

Coach Bob Boyd (Don basketball coach before the championship game between Fullerton and San Jose): "I like Fullerton to win this one without any trouble.'

Fullerton lost 77-67.

Boyd: "I still like Fullerton." Earle Truax (former SAC ournalist and student governmen leader): "Don, be sure to say hello to everyone in Santa Ana for me. It's really great here in San Jose. I'm serving my internship with a local television station here and like it very much.

Frank Erota (former SAC sports editor now working in San Francisco area): "San Jose has a good club but I feel that Bakersfield had the best team in the tournament."

week for the CIPA convention, we were able to sneak away to nearby San Jose on Friday and Saturday nights to see the State JC Basketball Finals.

Although Fullerton lost the decider to San Jose, 77-67, the Hornets appeared to have better material. After hitting 57 per cent on Friday night to beat Los Angeles City College, Alex Omalev's hotshots cooled off considerably in the finals.

And that partisan home town crowd did not help matters any.

On the way into San Francisco from International Airport, we took our first look at Candlestick Park, the new home of the Giants. The stadium sits practically in the water, and we are betting right now that those three Willies park a few baseballs into San Francisco Bay this year.
